

WORKSHOP

GAMBA MANAGEMENT - COLLECTIVE ON-GROUND ACTION

 **1:00 PM to 4:30 PM**

Collaborate with experts, share insights, and discover strategies that are making a difference in our fight against this invasive species.

 **Tuesday, 19 November**

Gamba grass is a highly invasive weed creating high fuel loads causing intense wildfires that decrease biodiversity and threaten lives.

 **Darwin Convention Centre**

This workshop, we will provide an overview of various gamba grass management initiatives and activities across the Northern Territory.

 **\$115 Member**
\$125 Non-Member

Participants will look at progress in the context of strategic gamba grass management, including direction provided by the 2020-2030 Gamba Grass Plan, and explore management outcomes using a variety of measures, including gamba grass management units, herbicide effectiveness, hectare treatment costs, and valuable learnings from recent initiatives.
